Lab 7

Objective

The objective of this task is to successfully download, install, and configure Balsamiq Wireframes. This tool will be used in future labs to create low-fidelity user interface (UI) mockups and wireframes for software design projects.

System Requirements

- Operating System: Windows 10/11
- Software: Balsamiq Wireframes for Desktop (Latest Version)
- RAM: 4GB minimum

Procedure

Step 1: Download the Installer

1. Navigate to the official Balsamiq website (balsamiq.com/wireframes/desktop).
2. Click the "Download for Windows" button.
3. Save the setup file to the local drive.

The screenshot shows the Balsamiq Wireframes website. At the top left is the Balsamiq logo (a smiley face) and the text "Balsamiq Wireframes". Below this, it says "October, 20th 2025 - 116.53 MB - Trial". To the right is a large green button that says "Free Download". Below the button is a green checkmark icon and the text "Security Status".

Below the header, there are four tabs: "Review" (which is selected and underlined), "Screenshots", "Change Log", and "Old Versions".

Under the "Review" tab, there is a table with the following information:

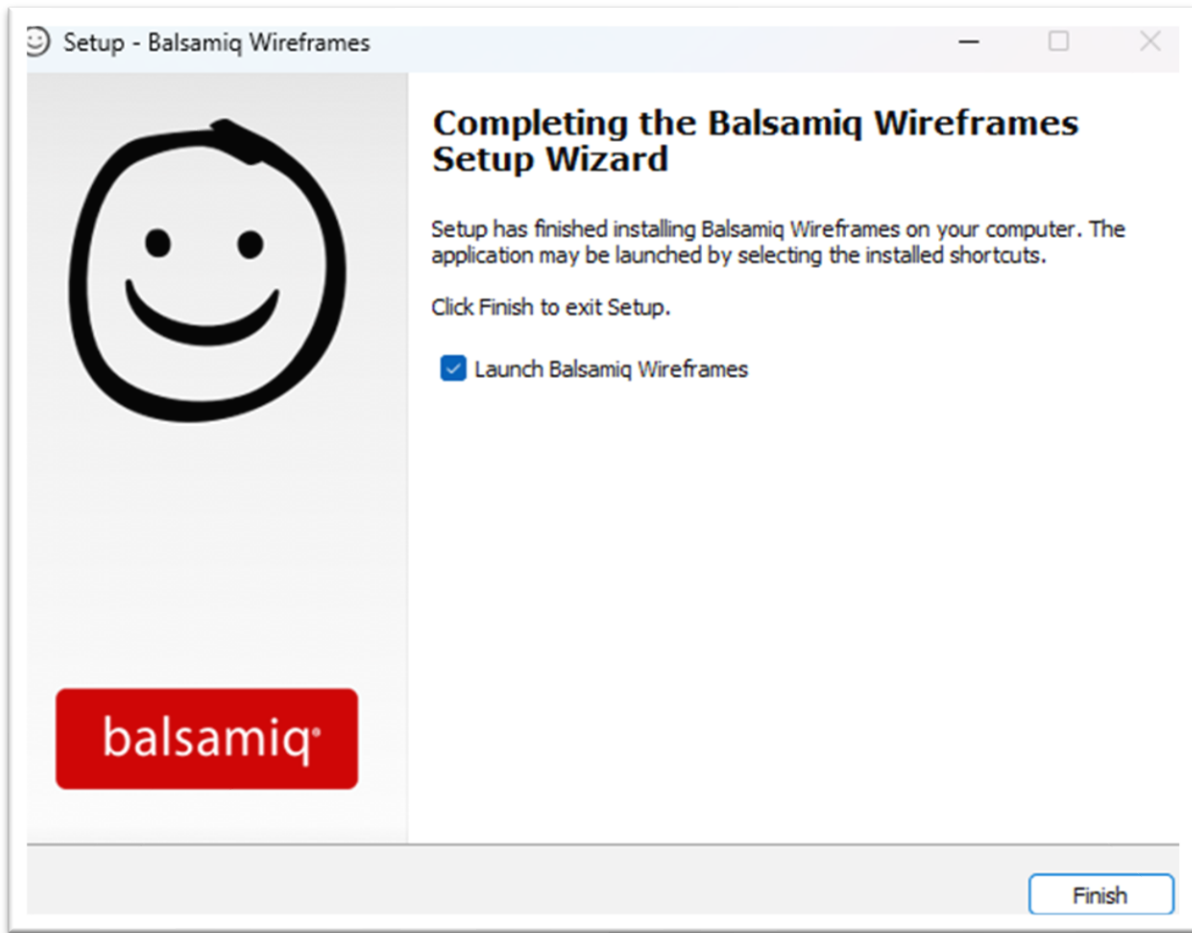

Latest Version	Balsamiq Wireframes 4.8.6 (64-bit) LATEST
Review by	Daniel Leblanc
Operating System	Windows 7 64 / Windows 8 64 / Windows 10 64 / Windows 11
User Rating	★★★★★ Click to vote
Author / Product	Balsamiq Studios LLC / External Link

To the right of the table, there is a "Sponsored" section featuring the NordVPN logo and a blue button that says "Get 71% Off!". Below this is a "Recommended" section featuring the dbForge SQL logo.

Step 2: Run the Installation Wizard

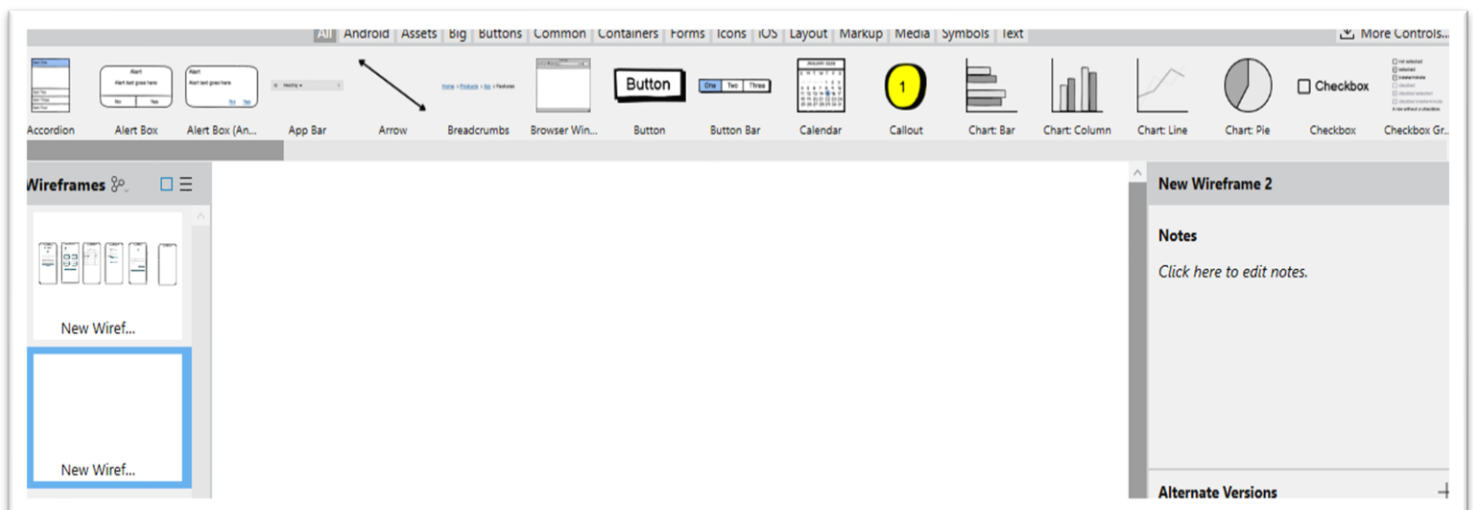

1. Double-click the setup file (Balsamiq_Wireframes_Setup.exe).

2. Accept the license agreement and select "Install".
3. Wait for the installation progress bar to complete.

Step 3: Verification

1. Click "Finish" to launch the application.
2. Verify that the workspace loads correctly and the toolbar is visible.

Conclusion

The Balsamiq Wireframes software was successfully installed on the system. The application launches correctly, and the environment is ready for creating low-fidelity mockups.
